NSF SUMMER INSTITUTE

Led a group of 4 undergraduate students for a 2-week, NSF funded, summer institute at VBI in 2012.

Work Experience, October 2011 to Present
Radio DJ, WUVT 90.7 FM

- Host a weekly radio broadcast on WUVT 90.7 FM. At WUVT there are no program guides, the format for each show, as well as each song, is personally selected by the DJ. Digital music is avoided, only records or CDs are played, the control board & turntables are controlled manually by the on-air DJ.
- I strive to select music that creates a fluid, seamless listening experience for each and every broadcast.
- Input info for each song into Quicktracks (Song title, artist, album, label) meant for radio archiving, online listeners, as well as digital displays for any satellite listeners.
- Read PSAs, weather, station IDs, and underwriting at the appropriate times, and log all of this information, as well as power readings.
- Member of the aircheck quality control staff, which allows me to help improve the station from the backend.

SOFTWARE & HARDWARE

Adobe Creative Cloud Suite: Dreamweaver, Flash, Illustrator, InDesign, Photoshop, Premiere, Media Encoder, Acrobat.
